Direction (71-75) Read the following passage carefully and answer the questions given below it.

A long time ago, on a big tree in the lap of the mountain, lived a bird named Sindhuka. It was a rather special bird because its droppings turned into gold as soon as they hit the ground. One day, a hunter came to the tree in search of prey and he saw Sindhuka's droppings hit the ground and turn into gold. The hunter was struck with wonder. He thought, "I have been hunting birds and small animals since I was a boy, but in all my 80 years, I have never seen such a miraculous creature. He decided that he had to catch the bird somehow. He climbed the tree and skillfully set a trap for the bird. The bird, quite unaware of the danger it was in, stayed on the tree and sang merrily. But it was soon caught in the hunter's trap. The hunter immediately seized it and shoved it into a cage. The hunter took the bird home joyfully. But as he had time to think over his good fortune later, he suddenly realised, "If the king comes to know of this wonder, he will certainly take away the bird from me and he might even punish me for keeping such a rare treasure all to myself. So it would be safer and more honourable if I were to go to the king and present the unique bird to him," The next day, the hunter took the bird to the king and presented it to him in court with great reverence. The king was delighted to receive such an unusual and rare gift. He told his courtiers to keep the bird safe and feed it with the best bird food available. The king's prime minister though, was reluctant to accept the bird. He said "O Rajah, how can you believe the word of a foolish hunter accept this bird? Has anyone in our kingdom ever seen a bird dropping gold? The hunter must be either crazy or telling lies. I think it is best that you release the bird from the cage." After a little thought, the king felt that his prime minister's

words were correct. So he ordered the bird to be released. But as soon as the door of the cage was thrown open, the bird flew out, perched itself on a nearby doorway and defecated. To everyone's surprise, the dropping immediately turned into gold. The king mourned his loss.

d) People from the city had informed him about the bird's whereabouts

e) He was attracted by the birds calls

Direction (76-81) Read the following passage carefully and answer the questions given below it.

The King of Kanchi set off to conquer Kamat. He was victorious in battle. The elephants were laden with sandalwood, ivory gold and precious stones, taken from the conquered kingdom of Kamat. They would be a part of the victory parade for his subjects. On his way back home he stopped at a temple, finished his prayers to the goddess and turned to leave. Around his neck, was a garland of scarlet hibiscus and as was the custom for all, his forehead was anointed with red sandal paste. His Minister and the court jester were his only companions. At one spot, in a mango grove by the wayside, they spied some children play. The King said, "Let me go and see what they are playing." The children had lined up two rows of clay dolls and were playing warriors and battles. The king asked, "Who is fighting with whom?" They said, "Kamat is at battle with Kanchi." The king asked, "who is winning and who is the loser?" The children puffed their chests up and said, "Kamat will win and Kanchi will

lose." The Minister froze in disbelief, the King was furious and the jester burst into laughter. The King was soon joined by his troops and the children were still immersed in their game. The King commanded, "Cane them hard." The children's parents came running from the nearby village and said, "They are naïve, it was just a game, please grant them pardon." The King called his commander and ordered, "Teach these children and the village a lesson so that they never forget the king of Kanchi." He went back to his camp. That evening the commander stood before the King. He bowed low in shame and said, "Your Majesty, with the exception of hyenas and vultures, all lie silent in the village." The Minister said, "His Majesty's honour has been saved." The priest said, "The goddess has blessed our King." The jester said, "Your highness, please grant me leave to go now." The King asked, "But why?" The jester said, "I cannot kill, I cannot maim, I can only laugh at God's gift of life." Trembling in the face of the King's anger he bravely continued, "If I stay in your Majesty's court, I shall become like you and I shall forget how to laugh."

Option **D**

Explanation:

Let number of notes of each denomination be x .

$$\text{Then } x + 5x + 10x = 480$$

$$\Rightarrow 16x = 480$$

$$\therefore x = 30.$$

$$\text{Hence, total number of notes} = 3x = 90.$$

14.

Option **C**

Explanation:

Let the number of students in rooms A and B be x and y respectively.

$$\text{Then, } x - 10 = y + 10 \Rightarrow x - y = 20 \dots (i)$$

$$\text{and } x + 20 = 2(y - 20) \Rightarrow x - 2y = -60 \dots (ii)$$

Solving (i) and (ii) we get: $x = 100$, $y = 80$.

\therefore The required answer $A = 100$.

$$\sqrt{4 + \sqrt{4 + \sqrt{10000}}} = \sqrt{4 + \sqrt{44 + 100}} = \sqrt{4 + 12} = \sqrt{16} = 4$$

Conclusions

I. $J @ T$ means $J > T$

II. $J \% T$ means $J = T$ (Either I or II is True)

III. $D @ T$ means $D > T$ (True)

So, It is clear that either Conclusion I or II and III are true.

48 (Option C)

$R > N < D \leq J \geq B$

Conclusions

I. $R @ J$ means $R > J$ (False)

II. $J @ N$ means $J > N$ (True)

III. $B @ D$ means $B > D$ (False)

So, It is clear that only Conclusion II is true

49 (Option C)

$W < B = V \leq R > K$

Conclusions

I. $K \odot B$ means $K < B$ (False)

II. $R \# B$ means $R \geq B$ (True)

III. $V @ W$ means $V > W$ (True)

So, It is clear that both conclusion II and III are True.

50 (Option B)

$H \leq M \geq T > D < R$

Conclusions

I. $D \odot M$ means $D < M$ (True)

II. $R @ M$ means $R > M$ (False)

III. $H \$ T$ means $H \leq T$ (False)

So, it is clear that only Conclusion I is true.

Relation between Paarth and Keshav can not be established with the help of both Statements I and II.

IPPB Prelims : Model Paper - 1 – Based on Memory

So, both the statements are not sufficient to answer the question.

65. (Option E)

As given in the Question, $M + N + O = 50$ yr

$$N = M + 10$$

So, Now solve the equation

$$M + N + O = 50$$

$$M + (M + 10) + 30 = 50$$

$$2M + 40 = 50$$

$$2M = 50 - 40$$

$$2M = 10$$

$$M = 10/2$$

$$M = 5$$

$$N = M + 10$$

$$N = 5 + 10$$

$$N = 15$$

So, both statements are required to answer the question.

66. (Option E)

From Statement I

Number of Students in class = 21 or 22 or 23 or 24 or 25 or 26

From Statement II

Number of Students in class = 25 or 26 or 27 or 28 or 29 or 30

Since, number of students can be divided into groups of 5 students, therefore number of students must be multiple of 5.

Number of students in the class = 25 or 30

On combining Statements I and II

Number of students in the class = 25

Hence, the data in both the Statement I and II together are necessary to answer the question.

67. (Option D)

From Statement II
